PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

---

TNG TARGET NUMBER: \_\_\_\_\_ SESSION NUMBER: 1

DATE OF SESSION: 22 AUG 88 DATE OF REPORT: 22 AUG 88

START: 0844 END: 0944

METHODOLOGY: CRV VIEWER IDENTIFICATION: 025

EVALUATION: 3 MONITOR: 018

---

1. (S/NF/SK) MISSION: To access and describe the target location, related objects, purposes, functions, etc.
2. (S/NF/SK) VIEWER TASKING: The target site is a location at encrypted coordinates: 750301/902967. Once site contact is achieved, the stress will be on accessing and describing objects found there.
3. (S/NF/SK) COMMENTS:
  - a. Inclemencies: None reported.
  - b. 025 correctly accessed the target location in stage 1, and proceeded to "zero in" on objects found there.
  - c. Stages 1-3 were especially strong and correct, both in structure and content. 025's growing understanding of Stage 4 structure is evidenced by fewer errors, as well as his/her tendency to accurately self-correct errors as soon as they are made. In- and after-session talk with 025 about structure is becoming less about rote performance and more about concepts of and advanced uses for the structure, which also evidences 025's growth at a deeper level of understanding.
4. (S/SS) EVALUATION: 3

### Summary

The site is a water/air/structure/mountain interface.

A multi-dimensional object which is metallic, gray/black and white, flies fast through the air in an upward, outward energy motion. This object is heading (viewing, looking for or at something). The air is colder with altitude.

There are large objects in an open area on the ground.

There are pads located on the surface.

One of these objects has a circular component which includes spinning motion.

Either people are not supposed to know that all of the objects are present or what activities actually take place (covert).

These objects, involving technology, are positioned in a uniform organized way.

A gray/black, man-made structure is constructed of slanted paneled walls and artificial cushion material.

A shiny, silver gray, round object reflects light and is extending from under water to directly above the surface (raised). The connected submerged area of this object is stationary.

*This is a so called "secret"*

*document.*

*I stopped at this point w/ the  
"omniscient" area sample aspect  
of this secret is readily explainable  
by the member. S.*
